

Terra

by Laurie Wiid van Heerden

Latin for “earth” the Terra brings weight and grounding to planters raised up on stands in the mid-century modern tradition. It is also square adding to the solidity and the wooden bases are contoured and sculpted into the planter making for a stable earthy interpretation that still feels light, modern and elegantly curvaceous.

SPECIFICATIONS

TER13W

stone with wood
weight: 82kg (187lb)
inch: 23.7x15.9x51.2"

TER07W

stone with wood
weight: 70kg (154lb)
inch: 23.7x20.9x27.6"

TER09W

stone with wood
weight: 37kg (99lb)
inch: 17.8x12.4x36.3"

TER05W

stone with wood
weight: 32kg (66lb)
inch: 17.8x15.6x20.7"

TER08W

stone and wood
weight: 95kg (265lb)
inch: 48.1x17.3x33.5"

LINERS

round
soil: 77 gal | 271
volume: 1.6 gal | 61

square
soil: 5.3 gal | 20 l
volume: 0.9 gal | 3.5 l

square
soil: 2.5 gal | 9.48 l
volume: 0.48 gal | 1.82 l

Finish Options

Black

Sandstone

Terracotta

White

Brown

Grey

natural wood

oiled wood

Liners

“Self-Watering” Liners

All Indigenous planters come with a liner for planting. The drawings show the sizes and capacities. These liners have been designed to house plants in proportion to the size of the planters. They contain a water reservoir at the base into which the roots grow. Using the process of “capillary action” the water is pushed up into the soil.

Water levels in the reservoir can be measured using the cap gauge and the liner has a plug which must be removed if the planter is exposed rainfall.

The liners usually need 14 weeks to integrate with the root system during which watering should be done the normal way onto the soil. Thereafter in typical conditions the reservoir only needs filling once or twice a month

Always use the planter in conjunction with the liner and remove the plug at the base of the liner and the base of the planter if the planters are going to receive rainfall.
